

Experiment 3: Property Buying & Rental Process System

Aim

To create a cloud software application for Property Buying and Rental Process in Chennai city using SaaS.

Procedure

Login to the cloud service provider.

Create a new application named “Property Buying and Rental System.”

Design forms for Property Owner Details, Property Details, and Customer Details.

Add fields such as Property Type, Location, Price, Rent Amount, and Contact Number.

Create reports to display available properties.

Configure search and filtering options.

Deploy the application to the cloud platform.

Enter sample property records.

Test property search and rental booking functions.

Result

A cloud-based Property Buying and Rental System was successfully created and deployed using the SaaS model.
